

Your logistics requirements. Clearly coordinated.

Vektor Ocean Logistics (VOL) coordinates transport and logistics support for business and project requirements. Each request starts with the route, schedule, cargo characteristics, and agreed operational responsibilities.

From requirements to delivery

We review requirements, coordinate suitable providers, and prepare quotations with a defined scope of work. Vehicles, equipment, and marine resources are confirmed for each request.

Service scope

01

Land Transportation

Coordination for light vehicles, general trucking, container haulage, and dedicated movements based on route and cargo requirements.

02

Project Logistics

Planning and coordination for machinery, heavy equipment, oversized cargo, and project loading/unloading requirements.

03

Marine Logistics

Coordination for tug & barge, LCT / landing craft, vessel inquiries, and project cargo by sea through suitable resources.

04

Logistics Support

Warehousing, temporary storage, cargo handling, stuffing/stripping, packing support, and coordination for forklifts, cranes, surveys, or inspections.

Resource availability and suitability depend on route, schedule, capacity, and confirmation. Resource categories do not imply ownership or guaranteed availability.

How we work

1. Share your route, dates, and cargo details.
2. Review requirements and confirm resources and costs.
3. Agree the scope, quotation, and operating terms.
4. Coordinate execution, documentation, and delivery.

Prepare your request

Origin and destination • Required dates • Cargo type, weight, and dimensions • Site access • Loading/unloading responsibilities • Contact person
